OPEN SOURCE PROJECT

GPU optimized Poisson Reconstruction Jun. 2022 – Aug. 2022

CUDA, C++

Personal Project

Specific tasks:

- Use the conjugate gradient solver to get the least squares solution for the Laplacian over the octree. Finally extract the surface through Marching Cubes.
- Implement the parallel octree building on GPU and parallelly extract the surface with reference to pseudocode, which doesn't have open source implementation before. $\times 40$ efficiency improvement is achieved on NVIDIA RTX 2050.
